DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 42-46 and 48-57 are rejected under 35 U.S.C. 102(a) as being anticipated by Koduri (USPN 6273321 B1).

Koduri teaches a wire bonding apparatus comprising a wire feeding device (capillary, 40) and a mechanism for moving and operating the device for forming multiple bonds (figure 1 and col 3 lines 1-23) via a controlled drive unit (52). The control unit comprises a computer and measuring means for positioning the capillary (col 5 lines 1-46 and col 13 line 49 – col 14 line 35) and is capable of forming bonds at an angle via translational, vertical and rotation movement (col 4 line 50 – col 5 line 3, col 6 lines 3-10 and lines 21-34). The device also comprises a controlled ball forming means (29) (col 5 line 47 – col 6 line 34). See also column Koduri claims 1-5.

3. Claims 42-46 and 48-57 are rejected under 35 U.S.C. 102(b) as being anticipated by Bonham, Jr. (USPN 4445633).

Bonham teaches a wire bonding apparatus comprising a wire feeding device (capillary, 19) and a mechanism for moving and operating the device for forming

Application/Control Number: 10/002,175

Art Unit: 1725

multiple bonds via a controlled drive unit. The control unit comprises a computer and measuring means for positioning the capillary (figure 1 and col 4 line 38 – col 5 line 22) and is capable of forming bonds at an angle (figures 3-5 and col 8 line 34-57). The device also comprises a controlled ball forming means (col 3 line 41 – col 4 line 11). See also column Bonham claims 1-7 and 11.

Response to Arguments

4. Applicant's arguments with respect to claims 42-46 and 48-57 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

5. Claims 1-8, 9-13 and 18-41 are allowed.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yasuzato et al. (USPN 5060843, apparatus, capillary, drive, computer, program, capable of bonding at angles, ball forming means), Moon (USPN 6189765 B1, apparatus, capillary, drive, computer, program, measuring means, capable of bonding at angles, ball forming means), Kirshenboin et al. (USPN 4327860,

Art Unit: 1725

apparatus, capillary, drive, computer, program, measuring means, capable of bonding at angles, ball forming means) and Toh et al. (USPN 6091140, apparatus, capillary, drive, computer, program, measuring means, capable of bonding at angles, ball forming means).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lynne Edmondson whose telephone number is (571) 272-1172. The examiner can normally be reached on Monday through Thursday from 6:30 a.m. to 5 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Dunn can be reached on (571) 272-1171. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
